2010 DESIGN RESOURCES

What's in a resource? Simply put: everything. When it comes to design, resources are the most important tools in a professional's arsenal. Combined with imagination and innovation, they make a vision come to life. This issue is dedicated to the brands, vendors, manufacturers and artisans who make design possible in Florida. Our **SHOWROOM DIRECTORY** highlights the top sources for lighting, flooring, furniture, millwork and bed and bath in the state — this year we even asked 12 designers to tell us who their particular favorites are and why. Our 16 pages of interiors feature extensive information about resources — in addition to insight from their respective designers as to inspiration. And our product showcase highlights home accessories with fashionista style. Want the scoop? **Just turn the page...**

FLORIDA'S DESIGN CENTERS

are the working hubs for global design projects.

With thousands of exquisite products under one roof or in a concentrated area, clients are able to make decisions quickly and designers can present entire projects in a professional environment.

DCOTA DESIGN CENTER OF THE AMERICAS

Over 700,000 square feet of space with thousands of lines represented in 100+ showrooms. The new DCOTA Design House of 15 rooms, created by prestigious designers, is a real attraction for consumers seeking ideas. Designer Referral Service available.
